CONTROL

## JUST CONNECT AND KEEP YOUR COOL FROM ANYWHERE

Heatcraft Refrigeration Products brings to you our new web-based online remote monitoring and control capability uniting connectivity expertise and refrigeration systems in one innovative online service. This service empowers you to keep an eye on your refrigeration anywhere you access the internet, offering peace of mind while ensuring the integrity of your food supply.

## Combining the power of your new or existing Heatcraft Beacon II™ refrigeration system with this service provides:

- Increased product integrity and safety
- Custom graphing and data download functionality
- 24/7 monitoring (Alerts sent via e-mail or text)
- Reduced maintenance and diagnostic costs
- Ability to remotely modify and optimize system parameters.
